DETAILED ACTION

Election/Restrictions

The Examiner apologizes for the error in grouping the claims in the previous restriction requirement. Therefore, the previous restriction requirement is withdrawn and the following restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to the calibration of lateral coordinate information for a surface shape measuring apparatus, classified in class 356, subclass 450.
- II. Claims 12-16, drawn to a stop for a surface shape measuring apparatus, classified in class 356, subclass 513.

The inventions are distinct, each from the other because of the following reasons:

- 1. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a stop for a microscope. See MPEP § 806.05(d).
- 2. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 3. A telephone call was made to George Simion on 04/29/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
